TURNBUCKLE COVERS

⫢ **Protect yourself and your sails from exposed Cotter Pins!**

⫢ **Polyester textile will not crack, shatter or ride up the rig like PVC covers.**

⫢ **More attractive, softer and easier to clean than plastic covers.**

⫢ **Install standard Turnbuckle Covers when (re-)attaching turnbuckles.**

⫢ **Removable Turnbuckle Covers install *without* removing turnbuckles. Polyester Velcro® fasteners allow easy installation at any time.**

INSTALLATION INSTRUCTIONS

Standard Turnbuckle Covers:
❶ Unscrew swage stud from turnbuckle if not already disassembled. Slide swage stud through the top hole in the Turnbuckle Cover.
❷ Slide the Turnbuckle Cover down over the turnbuckle.
❸ Use the polyester line provided to secure the Turnbuckle Cover to the toggle or mounting plate.
❹ Spray down occasionally with a water hose to remove dust and dirt. Any common liquid soap will remove stubborn dirt.

Removable Turnbuckle Covers:
❶ Starting with the narrowed end of the Removable Turnbuckle Cover, close the Turnbuckle Cover around the swage and down the length of the turnbuckle using the Velcro® fasteners.
❷ Using the polyester line provided, secure the Removable Turnbuckle Cover to the toggle or mounting plate.
❸ Spray down occasionally with a water hose to remove dust and dirt. Any common liquid soap will remove stubborn dirt.

● Removable Turnbuckle Covers are slightly longer than standard Turnbuckle Covers to allow usage with jaw-jaw turnbuckles and marine eyes.

Made in the USA
